THE STOIC CLASSIC · ANNOTATED EDITION

Some things are yours. Others are not. Know the difference.

Born a slave, lamed in body, banished from Rome by an emperor, Epictetus became the most practical teacher of the Stoic school. His lessons, written down by his pupil Arrian, have guided soldiers, statesmen and ordinary readers for nearly two thousand years.

This beautifully designed annotated edition presents George Long's classic selection from the Discourses and the complete Enchiridion, and adds what today's reader needs: a clear guide to Stoic ideas, a plain-language note and a small practice for every discourse and chapter, and a guided 30-day practice.

- 66 discourses and the complete Enchiridion
- A plain-language note on every discourse and chapter
- A small practice and a key line for each
- A guided 30-day practice with space to write
- Stoicism in brief, a glossary and a Quick Finder

"Men are disturbed not by the things which happen, but by the opinions about the things."
